HILLSIDE MINE IS LEASED ON PER CENT

The next step in the development of the new Arizona gold fields has been taken and the panning out of rich ground to leasers has begun, says the Phoenix Republican. Two leases have been made by President Sharpe on the Salome Hillside group after the manner of the leasing system in vogue in Colorado and Nevada, and with very similar terms and requirements. That is the news, or part of it, at least, brought back by Homer B. King, who returned from the gold camp yesterday, and verified also by the leasers, who are also here preparing to begin business at once.

One of the leases is to be known as the Cowboy lease, the parties to it being C. B. Holman, the discoverer of Rawhide, also interested in the Bouse district, and R. L. Hall. The Cowboy lease covers the east end of the block of the Hillside claim and contains about ten acres. Holman and Hall have secured teams for transportation purposes and will begin the driving of a tunnel at once. They expect to make good money after paying the royalty, and have confidence in the ground, for their lease only runs eighteen months, so they figure on getting early results. They were on the ground and gave it a careful prospecting, bringing down a large number of samples for assaying, and in their exploration discovered a very pleasing ore body on the property that had not previously been noticed by the owners. Free gold was in evidence, and the rock would have been pronounced as most enticing to anybody except under the shadow of the big bonanza, but it looks good to the leaseholders, and they will take a chance on it.

The other lease was the center block of the Hillside, a somewhat smaller area than the Cowboy lease, and was disposed of by Ernie Hall and associates, who have organized what they call the Salome Bonanza Mines Company. They started an outfit out and began actual work on the property on Thursday.

The two leasers in the exploitation of the property will begin close together and work in opposite direction, one to the east and the other to the west, along the contact.
